Your development -
from us
injected in plastic

Plastic parts according to your requirements

For many years high-precision gears made from plastics and zinc die-cast have been our passion. Mould making has been the key to our constant success in this sector. Technical plastic parts are our logical vision to develop further, build upon our past success and use the great potential our company has.

We would be glad to become your reliable supplier for all topics related to your need of plastic parts - whether this includes mould design and construction with subsequential plastic-moulding or the relocation of existing injection moulds for production of large series. Zipperle Antriebstechnik GmbH is dedicated passionately to accept and master new challenges as well as facing complex tasks. We are sure that our team of specialized and highly skilled experts will find suitable cost-efficient and high-quality solutions for you. Cutting edge technology and state-of-the-art machinery

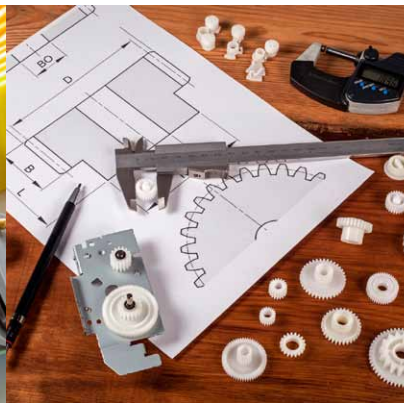

in milling, lathing and injection-moulding ensure efficient manufacturing in highest quality. With clamping forces ranging from 25 t up to 300 t we are able to offer a wide variety of applications in plastic injection moulding.

We would like to be a powerful innovative partner and become part of your success.

We are looking forward to receive your inquiries for technical plastic parts.
